LinkedIn: www.linkedin.com/in/vijaybaghel1041

Results-driven Full Stack Java Developer with 4 years of experience in building scalable enterprise-grade applications across FinTech, Audit Systems, IAM, and E-commerce domains. Strong expertise in Java, Spring Boot, Angular, Microservices Architecture, and Cloud deployments on AWS. Experienced in implementing secure authentication mechanisms (JWT, OAuth2), designing high-performance REST APIs, and developing dynamic frontend dashboards. Passionate about writing clean, maintainable code and delivering business-focused solutions in Agile environments.

SKILLS

- **Frameworks:** Spring Boot, Hibernate ORM, Web Services (SOAP & REST).
- **Delivery Methods:** Agile(Scrum), Jira, waterfall, SDLC, ISTQB standards.
- **Tools & Platforms:** MS Office, IntelliJ, JIRA, Postman, Eclipse, VSCode, Cursor, STS, GitHub, BitBucket, Putty, WinScp
- **Database:** Proficient in SQL queries, database design, Oracle, and MySQL integration.
- **Version Control:** Knowledgeable in Git for Code Management and Collaboration.
- **Backend**-Java (Core & Advanced), OOPS, Multithreading, Spring Boot, Spring MVC, Spring Security,JPA, Spring JDBC, Hibernate, REST APIs, SOAP, Microservices Architecture, JWT Authentication, OAuth2
- **Frontend**-Angular, React, JavaScript, TypeScript, HTML5, CSS3, Angular Material, Reactive Forms, JQuery, Bootstrap
- **Database**-Oracle, MySQL, SQL Query Optimization, Database Design
- **Cloud & DevOps**-AWS (EC2, RDS, Secrets Manager), Maven, Apache Tomcat, Git, SourceTree
- **Monitoring & Testing**-JUnit, Mockito, Postman, Kibana, Grafana, Code Coverage Tools
- **Soft Skills:** Strong Communication, Problem-Solving, Team Collaboration, Critical Thinking, Time Management.

WORKEXPERIENCE

Nusummit Technology Ltd(System Analyst) Feb 2025 – Present

- Designed and developed a **role-based Audit & Inspection Management System** using Angular 16+ and Spring Boot in a **Microservices architecture**.
 - Integrated Angular frontend with Spring Boot **REST APIs** using HttpClient and RxJS.
 - Created dynamic forms using Reactive Forms with FormBuilder, including validation and custom error handling. Designed responsive UI using Angular Material + Custom CSS Grid Layout.
 - Used Interceptors to handle token injection and global error handling.
 - Implemented data tables with sorting, pagination, and filtering.
 - Designed a secure, role-based internal audit report system to automate compliance tracking and ensure only authorized user access.
 - Implemented secure **JWT-based authentication and authorization** with **Refresh Token mechanism** using Spring Security.
 - Designed normalized database schemas and optimized SQL queries for high-volume financial data,Implemented **role-based access control (RBAC)** for secure multi-user operations.
 - Integrated logging and monitoring using **Kibana & Grafana** for production issue tracking.
 - Participated in requirement analysis, **system design discussions**, and technical documentation as part of a 20-member team.
- Key Achievements:** Strengthened application security by implementing **JWT** token lifecycle management. Improved API performance through query optimization and efficient **exception handling**.

Reliance-Jio Info Ltd (Software Engineer) March 2024-Present

- Developed and implemented **PayPal Payment Integration** for an e-commerce platform using Core Java and Spring Boot, ensuring secure and seamless transaction processing.
- Designed and implemented **secure RESTful APIs** for efficient communication with PayPal, prioritizing data privacy and protection.
- Utilized **multi-threading** to optimize payment processing performance and responsiveness under high transaction loads.
- Built scalable microservices with Spring Boot, reducing **API response times by 25%** through optimized database queries.
- Deployed applications on **AWS EC2** with highly available **RDS databases** and leveraged **AWS Secrets Manager** for secure credential storage.
- Conducted rigorous testing using **JUnit** and integrated **Mockito** for reliable unit tests, achieving 90% code coverage.
- Created **reusable libraries and frameworks**, researching and integrating modern web API technologies for robust microservices architecture.
- Participated in **Agile/Scrum methodologies**, including sprint planning, daily stand-ups, and retrospectives, fostering a collaborative work environment.
- Actively contributed to code reviews, providing constructive feedback to maintain adherence to coding standards and best practices. Collaborated with cross-functional teams, including designers and QA engineers, to ensure smooth integration and high-quality deliverables.
- **Key Achievements:** Implemented **OAuth**-based authentication, boosting security and reducing unauthorized access.

Tech Mahindra (Software Engineer) August 2021 – August 2023

- Developed and maintained a **microservices-based IAM (Identity & Access Management) application** using Java 8, Spring Boot, and Spring Data JPA, implementing **Role-Based Access Control (RBAC)** with Keycloak.
- Leveraged **Data Structures & Algorithms (DS&A)**, SOLID principles, and design patterns to enhance application design and code maintainability.
- Designed and implemented **RESTful web services** integrated with **Oracle DB** and optimized data handling using Hibernate.
- Developed a robust **Reporting API**, responsible for its design, unit testing, debugging, and code quality checks to uphold high project standards.
- Collaborated with cross-functional teams to **troubleshoot production issues early**, contributing to the application's overall stability. Ensured adherence to coding standards, meeting strict deadlines without compromising code quality.
- Conducted training sessions and **knowledge transfer (KT)** for new team members, fostering a collaborative and informed team environment.
- **Key Achievement:** Reduced system authentication latency by 20% with Keycloak Integration.

Innoeye (Intern) July 2020 – November 2020

- Completed Training in Java and SQL, Proficient in Developing robust software solution and Database management system.
- Collaborated with senior engineers to debug and resolve key project issues, achieving 100% deliverable milestones.
- Designed and implemented database schemas for robust data storage solutions.
- **Key Achievement:** Played a key role in resolving 70% of logged issues Using Lombok SLF4j, significantly improving application stability.

EDUCATION AND CERTIFICATION

- **B.E. Computer Science and Engineering** from Technocrats institute of technology, Bhopal with 8.39 CGPA (2015- 2019)
- **Certification-** RedHat Delivery Specialist -Automation, Azure Certificate (AZ-900), Linux Fundamental, AWS Certificate

HONORS AND AWARDS

- Received "Star Performer Award" from the Client in 2022.
- Received Bravo Award for Contribution in 2023
